SITUATION ANALYSIS

Market Research · Industry Overview · Competitive Analysis · SWOT · PESTEL

\$2.3B

Egypt Digital Ad Market (2024)

96.3M

Internet Users (81.9% penetration)

\$1.79B

Digital Ad Spend 2025

500+

Agencies — 0 EdTech Specialists

1.1 Market Size & Demand

- Egypt's digital marketing and AdTech market is valued at **USD 2.3 billion (2024)**, growing ~7% YoY toward USD 2.31B by 2029 (Statista).
- Digital ad spend projected at **USD 1.79B in 2025**; social media advertising alone exceeds **USD 304.6M**.
- E-commerce spending grew **35% YoY** (Mastercard 2024) and is projected to exceed USD 5B — creating major demand for performance marketing.
- EdTech/Education sits at medium–high digital maturity with typical budgets of **EGP 5,000–25,000/month** — a realistic, recurring tier for Spark.

1.2 Main Customer Needs

- Measurable leads, enrollment numbers, and revenue — **not likes or reach reports**.
- Transparent, real-time ROI reporting they can show to stakeholders.
- An agency that understands their specific industry, learner journeys, and enrollment cycles.
- Fast, proactive communication — **WhatsApp response within 30 minutes** is a trust signal.
- Affordable, **performance-tied pricing** — not fixed retainers with zero accountability.

1.3 Key Digital Behavior Trends

- **96.3M internet users** (81.9% penetration); mobile internet grew +42% YoY — mobile-first is non-negotiable.
- 69% of Egyptians aged 18–34 engage with brand content on social media daily (Statista 2024).
- **TikTok: 41.3M users, +25% YoY** — dominant for learner-age audiences; algorithm rewards new accounts with reach.
- **WhatsApp penetration exceeds 72%** — primary pre-purchase channel; click-to-WhatsApp is the highest-converting EdTech enrollment format.
- Short-form video (15–45 sec, Egyptian-dialect captions) is the best-performing content format by a significant margin.
- 73% of Egyptian businesses increased digital budgets for AI-powered tools (Ken Research 2025).
- **Arabic GEO (Generative Engine Optimization) is effectively zero in Egypt** right now — a genuine 2–3 year first-mover opportunity.

1.4 Existing Customer Frustrations

- **60–70% annual churn** in SME agency retainers — clients are burned, skeptical, and constantly switching.
- Agencies deliver reach and impressions reports; clients cannot connect these numbers to sales or enrollment.
- Overpriced retainers (EGP 5,000–15,000/month) with generic content, no targeting strategy, zero accountability.
- Account managers handle **15–20 clients simultaneously** — communication is slow, reactive, and impersonal.
- Almost no agency offers outcome-based pricing below the **EGP 20,000/month tier**.
- Zero EdTech specialization — generalist agencies treat a training platform the same as a restaurant or clothing brand.

1.5 Current Market Solutions

Model	Prevalence	What It Delivers	Key Gap
Monthly Retainer	~75% of market	Fixed scope: posts, ads, reporting	No ROI accountability
Project-Based	~15% of work	One-off websites, campaigns	No ongoing relationship
Performance-Based	~5–8% of agencies	% of ad spend or CPL	Unavailable to SMEs
Hybrid Retainer+	~3–5% of agencies	Base retainer + KPI bonus	Rare, no EdTech focus

Spark Opportunity: Egypt's first EdTech-specialized marketing agency — combining performance-based pricing, WhatsApp-optimized enrollment funnels, Arabic-native content, and documented ROI — targeting a completely unowned niche.

1.6 Industry Overview

- 500+ registered digital marketing agencies in Egypt — **all based in Cairo or Alexandria**.
- Digital-first agencies grew from ~10% share (2015) to **~35% (2025)**; traditional ATL dropped from ~70% to ~40%.
- Top agencies serve multinationals at premium pricing — leaving a massive underserved SME and startup segment.
- Intense competition on price and creative execution; **almost zero competition on vertical specialization**.
- Programmatic advertising expected to reach **84–85% of all digital ad revenue by 2029** (Statista).

Acquisition Channels by EdTech Relevance

Channel	Industry Usage	EdTech Relevance
Meta Ads (Facebook/Instagram)	Universal — dominant	Very High
Google Ads (Search/Display)	High — real estate, medical, e-commerce	High

TikTok	Fast-growing — 41.3M Egyptian users	Very High (learner-age audience)
WhatsApp Click-to-WA	High — SMEs, clinics, education	Critical — enrollment channel
SEO / Organic Search	Medium — top agencies only	High (course discovery)
LinkedIn	Low — severely underutilized	High (corporate L&D;)
Influencer / Micro-Influencer	Growing — micro (10K–200K) trend	High (educator influencers)

Digital Maturity by Sector

Maturity Level	Sectors
High	Real estate, e-commerce, FMCG — multi-channel, performance-driven campaigns are standard.
Medium–High	Education/EdTech — active on social but strategy is weak; ROI tracking is rare.
Low	B2B, industrial, Upper Egypt — significant underdevelopment, near-zero agency competition.

1.7 Competitive Analysis — Top 3 Direct Competitors

Tactics Digital Agency — Performance / EdTech Crossover

Why Top Competitor	Target Audience	Main Channels
Documented 200–400% ROI case studies and 92% client retention rate. Directly competes on accountability — Spark’s core value proposition.	Real estate, SaaS, e-commerce — premium pricing excludes most EdTech SMEs.	Meta Ads, Google PMax, SEO, HubSpot automation, proprietary AI-powered keyword research.

STRENGTHS • Documented 200–400% ROI case studies public • 92% client retention rate — highest in market • Proprietary AI-powered keyword research tool • Google, Meta & HubSpot certified team	WEAKNESSES • Premium pricing excludes most EdTech SMEs • Cairo-only — no regional presence • No EdTech or training platform specialization • Small team limits client capacity
OPPORTUNITIES • Growing ROI accountability demand in EdTech • Performance marketing gap in governorates • AI tools reducing service delivery costs	THREATS • Specialized agencies (Spark) targeting their gap • Global agencies entering Egypt • Clients building in-house teams

Rekoya Agency — Independent Performance Leader

Why Top Competitor	Target Audience	Main Channels
Highest ROI performance rating among Egyptian independent agencies. Nimble, startup-friendly positioning overlaps with Spark's target profile.	Egyptian companies and startups — similar budget tier to Spark's EdTech target clients.	Meta Ads, Google Ads, SEO, content marketing.

STRENGTHS • Highest ROI performance rating among independents • Strong client trust and retention culture • Nimble, startup-friendly positioning • Agile and fast-response operations	WEAKNESSES • Limited brand recognition vs established names • Small team limits simultaneous accounts • No EdTech-specific case studies or positioning • Limited documented public portfolio
OPPORTUNITIES • Performance marketing for EdTech SMEs — large gap • Sector-specific specialization opportunity • Regional expansion beyond Cairo	THREATS • Well-funded performance agencies entering market • Economic instability cutting SME budgets • EdTech specialists winning on vertical expertise

GROW Agency — ROI-Focused / SME

Why Top Competitor	Target Audience	Main Channels
Closest public-facing positioning to Spark — ROI-first messaging and money-back guarantee targeting accountability-seeking EdTech SME clients.	SMEs and growth-stage companies — same budget tier and same frustrations as Spark's EdTech target clients.	Meta Ads, Google Ads, performance campaigns. ROI reporting is central.

STRENGTHS • Strong ROI-first messaging and brand positioning • Money-back guarantee — effective trust differentiator • Performance accountability culture • SME-accessible pricing model	WEAKNESSES • Newer agency — unproven at meaningful scale • Limited documented case studies and public proof • Small team, brand trust still being established • No EdTech or vertical specialization
OPPORTUNITIES • Massive underserved SME performance marketing segment • Growing demand for outcome-based agency models • Market trust gap creates real demand for guarantees	THREATS • Established agencies improving their ROI reporting • Market education still needed for performance model • EdTech specialists positioning more sharply on niche

1.8 Spark SWOT Analysis

STRENGTHS • First and only EdTech-specialized agency in Egypt — niche is completely unowned • Full service: SMM, paid ads, SEO, content, branding, and strategy • Deep understanding of learner psychology, enrollment journeys, and EdTech buying cycles • Serves both B2C learner acquisition and B2B corporate L&D; from day one • Clear positioning — 'We grow learning systems, not just brands' • Low overhead at startup stage means competitive pricing without sacrificing margin • DEPI-trained team with real research methodology and global platform knowledge	WEAKNESSES • Brand new — zero case studies or documented client results at launch • No established EdTech client network or warm referral base yet • Limited self-promotion budget while building operations simultaneously • Small team limits the number of client accounts manageable at quality • No proprietary Egyptian EdTech benchmarks (CPL, CAC) established yet • Risk-averse clients may prefer agencies with longer track records
OPPORTUNITIES • EdTech sector budgets EGP 5,000–25,000/month — realistic, recurring revenue • No competitor has claimed the EdTech niche — first-mover advantage available now • 73% of Egyptian businesses increased digital budgets in 2025 • Corporate L&D; is high-value, high-retention with almost no agency competition • Arabic-language EdTech content is severely underdeveloped — massive quality gap • WhatsApp enrollment funnels proven but almost no agency optimizes for EdTech • Arabic GEO is a genuine 2–3 year first-mover opportunity right now	THREATS • Established generalist agencies could pivot into EdTech if Spark gains traction • EdTech startups often have tight and unpredictable marketing budgets • 60–70% annual SME agency churn is a structural recurring revenue risk • Platform algorithm changes can hurt client results and agency reputation • Economic instability — marketing budgets are cut first under pressure • Freelancers offering cheaper EdTech-adjacent services remain a persistent alternative

1.9 PESTEL Analysis — Digital Marketing Lens

P — Political	• Egypt Vision 2030 and Digital Egypt initiative actively drive EdTech demand — direct tailwind for Spark's target clients. • MCIT's DEPI program validates digital marketing as a growth priority and adds credibility to Spark's credentials. • Ad content regulations for education and medical claims are tightening — Spark must build internal compliance review processes from day one. • Government investment in e-learning means more EdTech platforms will be launched and funded in the next 2–3 years.
E — Economic	• EGP devaluation makes USD-priced ad platforms (Meta/Google) more expensive for EGP-budgeting clients — ROI accountability becomes non-negotiable. • Economic pressure increases upskilling demand — more Egyptians seek online courses and certifications. • SME and startup funding is growing through Flat6Labs, Egypt Ventures, Mashroak — more potential EdTech clients getting financed. • EdTech sector typical monthly marketing budget: EGP 5,000–25,000 — viable and recurring for Spark. • Risk: marketing budgets are the first line item cut when Egyptian SMEs face financial pressure.

S — Social	• 60%+ of Egypt's population is under 30 — mobile-first, online daily, actively seeking career development. • Arabic-language content demand is growing fast — Egyptian consumers prefer Egyptian dialect, not translated corporate English. • Social proof is the primary trust mechanism — peer referrals and community reviews drive enrollment decisions before ads do. • Online certificates and digital credentials are now mainstream post-COVID — social acceptance has fully normalized EdTech. • 69% of Egyptian users aged 18–34 engage with brand content on social media daily (Statista 2024).
T — Technology	• 96.3M internet users; mobile internet +42% YoY — digital reach is genuinely massive and mobile-first at scale. • AI tools (ChatGPT, Midjourney, ElevenLabs) let small teams produce content at volume previously requiring larger agencies. • TikTok: 41.3M users (+25% YoY); algorithm rewards new accounts — levels the playing field for new agencies. • GEO (Generative Engine Optimization) is emerging — Arabic GEO expertise is near-zero in Egypt, creating a 2–3 year first-mover advantage. • Average Egyptian internet speed rose from 6.5 to 75.3 Mbps (2019–2024) — video and live streaming viable nationwide. • WhatsApp (72%+ penetration) is the dominant pre-purchase communication channel.
En — Environmental	• Online learning inherently reduces carbon footprint vs. physical training centers — EdTech clients can use this as a brand story element. • Corporate L&D; clients (banks, multinationals) increasingly use sustainability messaging — Spark should develop content frameworks for this angle. • Environmental considerations are not a major operational risk for Spark as a digital-first, low-overhead agency.
L — Legal	• Egypt Data Protection Law (Law No. 151 of 2020) governs data collection and ad targeting — Spark and all clients must maintain compliance. • Meta and Google have strict policies on educational claims — 'guaranteed job placement' in ad copy risks immediate account bans. • Client contracts must define deliverables, revision limits, and KPIs clearly — protects Spark and reduces scope-creep disputes. • IP ownership clauses for client content must be included in all service agreements from day one. • Medical training platform marketing carries additional sensitivity around health claims.

SECTION 02

OBJECTIVES

5 SMART Digital Marketing Objectives | Q2 2025 – Q1 2026

All objectives are SMART and grounded exclusively in data from the Situation Analysis. Timeframe: Q2 2025 – Q1 2026 (12 months from launch).

OBJ
1**Lead Generation & Enrollment Funnel**

- **Generate 150 qualified EdTech leads/month by Month 6**, scaling to 300/month by Month 12 via Meta Ads, TikTok, and WhatsApp click-to-chat campaigns.
- **Achieve a lead-to-enrollment conversion rate of $\geq 12\%$** across all managed client campaigns within 90 days of onboarding.
- **Reduce client CPL by 20–30%** vs. their pre-Spark baseline within the first 60 days, using WhatsApp enrollment funnels and refined Meta targeting.

OBJ
2**Client Acquisition for Spark**

- **Sign 5 EdTech retainer clients by Month 3** and 15 clients by Month 12, each paying EGP 5,000–25,000/month.
- **Achieve 0% involuntary churn in Year 1** by anchoring every client contract to documented KPIs and monthly ROI reports — directly countering the 60–70% industry churn rate.

OBJ
3**Brand Authority & Organic Visibility**

- **Rank on Page 1 of Google** for 10 high-intent Arabic-language EdTech marketing search terms within 9 months.
- **Build Spark's TikTok to 10,000 followers** within 6 months through organic Egyptian-dialect EdTech content, leveraging TikTok's new-account algorithmic reach advantage.
- **Publish 2 documented EdTech case studies** (with real CPL, enrollment, and ROI numbers) by Month 6, to be used as primary sales assets.

OBJ
4**Paid Media Performance — Spark's Own Campaigns**

- **Achieve ROAS of $\geq 3x$** on Spark's own Meta lead-gen ads for client acquisition by Month 4.
- **Maintain WhatsApp response time of ≤ 30 minutes** for all inbound leads — a documented primary trust signal in the Egyptian EdTech market — tracked via CRM timestamps.

OBJ
5**Arabic GEO First-Mover**

- **Launch Spark's Arabic GEO service offering** (Generative Engine Optimization) by Month 4, positioning Spark as Egypt's first agency to formally offer this — locking in a documented 2–3 year first-mover window.

SECTION 03

STRATEGY — STP MODEL

Segmentation · Targeting · Positioning

3.1 Segmentation

Based on the Situation Analysis, four distinct audience segments exist for Spark's services:

Segment A	B2C EdTech Platforms & Online Course Creators Egyptian operators selling directly to learners: coding bootcamps, language schools, professional certification platforms, tutoring apps. Budget: EGP 5,000–15,000/month Channels: Meta Ads + WhatsApp + TikTok Decision-Makers: Founders, Marketing Managers Primary Goal: More enrolled students, not more followers.
Segment B	Corporate L&D; / Training Providers (B2B) Companies selling upskilling programs, compliance training, or technical certifications to corporate HR departments. Budget: EGP 15,000–25,000/month Channels: LinkedIn + Google + ABM Decision-Makers: HR Directors, L&D; Managers, CEOs Primary Goal: Qualified corporate leads, not consumer volume.
Segment C	EdTech Startups (Pre-revenue to Early Stage) Newly funded EdTech startups (Flat6Labs, Mashroak ecosystem) with tight budgets but high growth ambition. Budget: EGP 5,000–10,000/month Channels: Meta Ads + TikTok + WhatsApp Decision-Makers: Founders, Co-founders Primary Goal: Fast, measurable traction + brand positioning.
Segment D	Government & Semi-Government EdTech Entities aligned with Egypt Vision 2030 and Digital Egypt/DEPI initiative. Higher budgets, longer procurement cycles. Budget: High / Project-based Channels: All channels — Arabic-native mandatory Decision-Makers: Government Program Managers Primary Goal: Credibility and scale, not immediate revenue.

3.2 Targeting

Priority targeting sequence for Year 1, based on budget viability, competitive gap, and speed-to-revenue:

Priority	Segment	Rationale
----------	---------	-----------

PRIMARY	Segment A — B2C EdTech Platforms	Highest volume, fastest sales cycle, budget fits EGP 5,000–25,000 range, WhatsApp and Meta funnel optimization is immediately deployable. Core revenue engine in Year 1.
SECONDARY	Segment C — EdTech Startups	Lower budget but strong referral network value and willingness to try performance-tied pricing. Use as case study generators for Months 3–6.
GROWTH	Segment B — Corporate L&D;	Higher value, higher retention. Requires LinkedIn strategy and B2B content capability. Pursue from Month 6 onward once initial case studies are built.
STRATEGIC / DEFERRED	Segment D — Government	Pursue selectively from Month 9+ for credibility and PR value. Not a primary revenue driver in Year 1.

3.3 Positioning

Spark is Egypt's only marketing agency that specializes exclusively in EdTech — combining performance-based pricing, WhatsApp-optimized enrollment funnels, Arabic-native content, and documented ROI reporting — for learning platforms that need enrollment growth, not vanity metrics.

Positioning Pillars vs. Direct Competitors

Pillar	Spark's Position	Competitor Gap
Specialization	Only agency in Egypt's 500+ market to publicly own the EdTech niche.	Tactics Digital, Rekoya, and GROW have zero EdTech case studies or vertical knowledge.
ROI Transparency	EdTech-specific metrics: CPL per course type, enrollment rate, learner LTV.	Competitors offer ROI messaging but no EdTech-specific funnel frameworks.
WhatsApp Funnel Ownership	72%+ penetration. Click-to-WhatsApp is the highest-converting EdTech format. Named, documented service.	No competitor optimizes specifically for WhatsApp in education.
Arabic-Native Content	Authentic Egyptian-dialect — not translated corporate English.	Documented consumer preference and competitor gap in Arabic GEO.
Performance-Tied Pricing	Available below EGP 20,000/month. Eliminates the #1 trust barrier for EdTech SMEs.	Gap that currently does not exist in the market.

SECTION 04

TACTICS

Channel Strategy · Funnel Breakdown — Awareness · Consideration · Conversion

All tactics are organized by funnel stage. Channel selection is based directly on the behavioral data in the Situation Analysis.

Funnel Stage	Primary Channels	Goal
AWARENESS	TikTok (organic), Meta Ads (video), LinkedIn (organic)	Build brand recognition within Egypt's EdTech founder community
CONSIDERATION	Meta Ads (retargeting + lead gen), SEO, Arabic content, Google Search Ads, WhatsApp nurture	Capture high-intent prospects and move them to consultation
CONVERSION	WhatsApp consultation, social proof assets, micro-influencer partnerships	Sign retainer clients, deliver first campaign results

4.1 Awareness Stage

TikTok — Primary Awareness Channel

- **Why:** 41.3M Egyptian users, +25% YoY, algorithm boosts new accounts — the single most cost-effective awareness play for Spark.
- **Content format:** 15–45 second Egyptian-dialect videos. Topics: EdTech marketing tips, funnel breakdowns, client results (anonymized), behind-the-scenes agency content.
- **Posting cadence:** 5x per week minimum. All captions in colloquial Egyptian Arabic.
- **Hashtag strategy:** Egyptian EdTech terms + marketing education terms. No corporate English.
- **Target:** 10,000 followers organically within 6 months.

Meta Ads — Awareness Video Campaigns

- Run awareness-level video ads (15–30 sec) targeting Egyptian EdTech founders and marketing managers, aged 25–45.
- Interest layers: online education, e-learning, training platforms, digital marketing, entrepreneurship.
- Ad format: short-form video testimonials + before/after enrollment funnel results.
- Budget: 20% of Spark's own ad budget to awareness. Keep CPM under EGP 8.

LinkedIn — Organic Thought Leadership

- Weekly long-form posts from Spark's founder profile: data-backed EdTech marketing insights, industry benchmarks, enrollment funnel analysis.
- Target: HR Directors, L&D; Managers, EdTech founders — the Segment B corporate buyer.
- Goal: Position the founder as the go-to EdTech marketing authority in Egypt.

4.2 Consideration Stage

Meta Ads — Retargeting & Lead Generation

- Retarget video viewers (50%+ watch time) with lead gen ads: free EdTech marketing audit, CPL benchmark report, or WhatsApp funnel consultation.
- Use Lead Gen Forms (native Meta) as primary conversion point — lower friction for Egyptian SME audiences.
- WhatsApp click-to-chat as secondary CTA — directly supported by the 72%+ penetration data.
- A/B test ad creatives weekly. Winning variant gets 80% of budget by Day 7.

SEO & Arabic Content Marketing

- Publish 2 long-form Arabic blog posts per week targeting high-intent search terms: course platform marketing, EdTech CPL reduction, enrollment funnel optimization.
- Target zero-competition Arabic keywords — market gap documented; most EdTech agencies publish only in English.
- Begin Arabic GEO optimization: structure all content for generative engine indexing (clear H1/H2, FAQ sections, direct answer formatting).
- Goal: Page 1 ranking for 10 Arabic EdTech marketing terms within 9 months.

Google Ads — Search Intent Capture

- Run search campaigns targeting Arabic and English EdTech marketing keywords in Egypt.
- Ad copy: result-first messaging. Example: '██████ ██████ ████████ | ████████ ROI ████████ | █████ ██████████'.
- Landing page: single-purpose Arabic-language page with one CTA — WhatsApp consultation or audit request.
- Budget: EGP 3,000–5,000/month initially. Scale based on CPL data.

WhatsApp Nurture Sequences

- All leads captured via Meta Lead Gen Forms enter a 5-message WhatsApp nurture sequence.

Message	Content
#1 — Instant	Introduction + free resource (EdTech marketing checklist)
#2 — Day 2	EdTech case study (anonymized) with enrollment numbers
#3 — Day 4	CPL benchmark data relevant to their specific course type
#4 — Day 6	ROI guarantee explanation and pricing model overview
#5 — Day 8	Consultation booking link — no-pitch, one question only

- Response time SLA: ≤ 30 minutes during business hours. Tracked via CRM timestamp.

4.3 Conversion Stage

WhatsApp Consultation to Proposal

- All qualified WhatsApp conversations follow a documented discovery script: budget, current CPL, platform type, previous agency issues, enrollment target.
- Proposal sent within 24 hours via PDF + WhatsApp voice note walkthrough. No complex presentations.
- Offer structure: performance-tied option (% of enrolled students or CPL-based) OR hybrid retainer (base EGP 5,000 + KPI bonus) — both available below EGP 20,000/month.

Social Proof & Case Study Deployment

- First two client results (Month 1–2) documented in structured before/after format: previous CPL vs. Spark CPL, previous conversion rate vs. new rate, enrollment delta.
- Published on website, TikTok, LinkedIn, and used in all retargeting ads from Month 3 onward.
- Directly addresses the identified Spark weakness: zero case studies at launch.

Influencer / Micro-Influencer Partnerships

- Partner with 2–3 Egyptian EdTech micro-influencers (10K–100K followers) for co-created content showing how their course grew with Spark.
- Structure: performance-based collaboration (not paid posts) — aligns with Spark's accountability positioning.

SECTION 05

ACTION

Campaign Structure · Content Plan · Team Roles · 12-Month Timeline

5.1 Content Plan

All content follows three rules grounded in the Situation Analysis: Egyptian Arabic dialect only, mobile-first format, result-led messaging — no reach reports, no vanity metrics.

Content Pillar	Format / Channel	Description
EdTech Marketing Education	TikTok / Reels (15–45 sec)	Enrollment funnel tips, CPL benchmarks, WhatsApp conversion tactics. Establishes authority.
Social Proof & Results	All channels — from Month 3	Anonymized client results as data visuals. Format: 'Before Spark / After Spark'.
Behind the Scenes	TikTok / Stories	Team, process, strategy sessions. Humanizes the agency. Key trust-builder in a low-trust market.
Arabic GEO Content	Blog / Long-form	Long-form Arabic posts + FAQ pages optimized for AI search engines. First-mover play.
EdTech Benchmarks	Blog / LinkedIn / PR	Original EdTech CPL and conversion benchmarks from client data. Published quarterly. PR + lead magnet asset.

5.2 Campaign Structure

Campaign 1
Months 1–3

- Spark Brand Awareness**
- Channels: TikTok organic + Meta video ads.
 - Objective: Build brand recognition within Egypt's EdTech founder community.
 - Budget: EGP 2,000–3,000/month. Organic-heavy at this stage.
 - Creative: 4 new short-form videos per week. Founder-fronted, Egyptian dialect.

Campaign 2
Months 1–12
(Ongoing)

- Client Acquisition**
- Channels: Meta Lead Gen + Google Search + WhatsApp nurture.
 - Objective: 5 signed retainer clients by Month 3, 15 by Month 12.
 - Budget: EGP 4,000–6,000/month on Spark's own paid media.
 - CTA: Free EdTech Marketing Audit. No commitment. One WhatsApp message.

Campaign 3

Months 2–12

Arabic SEO & GEO Authority

- Channels: Website blog + Google Search Console + AI engine indexing.
- Objective: 10 Page 1 Arabic EdTech keywords by Month 9.
- Execution: 2 Arabic blog posts/week, structured for GEO (FAQ format, direct answers, schema).

Campaign 4

Months 4–12

LinkedIn B2B Outreach

- Channels: LinkedIn organic + targeted connection requests.
- Objective: 3 corporate L&D; clients (Segment B) signed by Month 12.
- Execution: Founder posts 3x/week. Targeted outreach to HR Directors and L&D; Managers.

5.3 Team Roles

Role	Responsibility
Strategy Lead (Founder)	Overall campaign direction, client discovery calls, LinkedIn thought leadership, proposal sign-off.
Paid Media Specialist	Meta Ads, Google Ads, TikTok Ads — campaign setup, A/B testing, weekly optimization.
Content Creator / Copywriter	TikTok videos, Arabic blog posts, WhatsApp sequences, ad creatives. Egyptian-dialect native required.
Account Manager	Max 5 clients per AM. WhatsApp response SLA, weekly reporting, client communication.
SEO / GEO Specialist	Keyword research, blog optimization, Arabic GEO structured content, Google Search Console monitoring.

5.4 12-Month Execution Timeline

Period	Key Execution Steps
Month 1	Launch Spark’s website, TikTok, Instagram, LinkedIn. Set up Meta Ads Manager + Google Ads. Launch first client acquisition campaign. Onboard first 2 clients.
Month 2	Begin weekly Arabic blog content (2x/week). Launch Google Search campaigns. Start WhatsApp nurture sequences. First TikTok organic growth push.
Month 3	5 clients onboarded. Publish first case study. Launch retargeting ads with social proof creative. Review CPL benchmarks.
Month 4	Launch Arabic GEO service offering. Begin LinkedIn B2B outreach. Scale winning Meta ad creatives. Review OBJ 1–3 progress.

Month 5	Publish second case study. Review WhatsApp funnel conversion rates. Optimize nurture sequence based on data.
Month 6	TikTok 10,000 followers checkpoint. Review ROAS on Spark's own campaigns. Scale to 10 active clients.
Months 7–8	Begin micro-influencer partnerships. Launch quarterly EdTech CPL benchmark report as PR asset.
Month 9	Page 1 Arabic keyword rankings review. First corporate L&D; client target. Benchmark report published.
Months 10–11	Scale best-performing ad campaigns. Deepen LinkedIn B2B pipeline. Review churn rate — target 0%.
Month 12	15 active clients target. Full SOSTAC review. Year 2 plan built from documented performance data.

SECTION 06

CONTROL

KPI Dashboard · Tools · Optimization Protocol

6.1 KPI Dashboard by Channel

Channel / Area	KPI	Target	Tool
Meta Ads (Spark's own)	CPL — Spark client leads	≤ EGP 120/lead by M3	Meta Ads Manager
Meta Ads (Spark's own)	Lead-to-call conversion rate	≥ 25%	CRM (WhatsApp)
Meta Ads (Spark's own)	ROAS on acquisition spend	≥ 3x by Month 4	Meta Ads Manager
Meta Ads (Client campaigns)	Client CPL vs. pre-Spark baseline	20–30% lower in 60 days	Meta + Client CRM
Meta Ads (Client campaigns)	Enrollment conversion rate	≥ 12%	Client CRM + Meta
TikTok Organic	Follower growth	10,000 by Month 6	TikTok Analytics
TikTok Organic	Average video views	≥ 5,000/video by M3	TikTok Analytics
Google Ads	Search CTR	≥ 4%	Google Ads Dashboard
Google Ads	CPL from Search	≤ EGP 150	Google Ads + GA4
SEO / GEO	Arabic Page 1 rankings	10 keywords by Month 9	Google Search Console
SEO / GEO	Organic sessions growth	+40% MoM from Month 3	Google Analytics 4
WhatsApp Nurture	Response time SLA	≤ 30 min (business hours)	CRM timestamp log
WhatsApp Nurture	Nurture-to-proposal rate	≥ 35%	CRM pipeline
LinkedIn	Founder profile impressions	+30% MoM	LinkedIn Analytics
LinkedIn	Corporate L&D; leads	3 corporate clients by M12	LinkedIn + CRM

Spark Business	Active retainer clients	5 by M3 / 15 by M12	Internal dashboard
Spark Business	Monthly involuntary churn	0% in Year 1	CRM contract log

6.2 Measurement Tools & Reporting Cadence

Tool	Usage & Cadence
Meta Ads Manager	Daily campaign monitoring. Weekly creative review. CPL and ROAS tracked per ad set.
Google Analytics 4 (GA4)	Website traffic, source attribution, SEO performance, landing page conversion rates.
Google Search Console	Keyword rankings, CTR, Arabic GEO indexing status. Reviewed weekly.
TikTok Analytics	Video performance, follower growth, reach vs. engagement. Reviewed 3x per week.
LinkedIn Analytics	Founder post reach, profile views, inbound connection quality. Reviewed weekly.
CRM (WhatsApp-integrated)	Lead pipeline, response time SLA compliance, nurture sequence performance, deal stage tracking.
Monthly ROI Report	Delivered to every client by Day 5 of each month. Includes: spend, CPL, enrollments, conversion rate vs. previous month. No reach reports without enrollment context.

6.3 Optimization Protocol

WEEKLY	Channel Optimization • Meta Ads: Kill underperforming ad sets (CTR < 1.5% after 3 days). Scale winning creatives (CTR > 2.5%, CPL on target). • TikTok: Review top-performing video topics. Double down on content formats driving saves and shares. • Google Ads: Add negative keywords weekly. Review search term reports for irrelevant spend.
MONTHLY	Strategy Check • Review all KPIs against targets. Flag any channel underperforming by > 20%. • Review client CPL benchmarks — build internal EdTech CPL database per course category. • Client satisfaction check-in via WhatsApp voice note — direct input into retention strategy.

**QUART
ERLY****Full SOSTAC Alignment**

- Review Objectives progress against the 12-month SMART targets.
- Assess competitive landscape — flag any generalist agency moving into EdTech.
- Update positioning if needed based on documented case study results.
- Publish EdTech CPL benchmark report — doubles as PR, SEO, and lead generation asset.

Core Control Principle: Every campaign decision at Spark must be traceable to a number. If we cannot attach a metric to a marketing action, we do not run it. This is the same standard we hold our clients to — and it starts internally.
